

Coffee Table 80 - 2

Bronze, Steel

Coffee Table 80 - 2 is composed of narrow sheets folded into a solid and assertive form, expressing an equilibrium of density and lightness. The strong compositional statement is softened by supple characteristics of curved corners. Finished in two shades of mist bronze; a fiery warm bronze framing the lustrous glow of the gold bronze expands, granting the tabletop unique painterly qualities.

Each piece is a carefully hand crafted work of master artisans. Due to unique metal application processes, irregularities in the surface and finish should be seen as valuable, painterly quality of the hand made work.
