

Drinks Cabinet 83

Bronze, Zinc, Steel

Drinks Cabinet 83, named in reference to its proportions, is a composition of narrow planes in bronze and zinc that intersect and overhang. A body of softly rounded edges offset angular interior intersections. Finished mainly in a textured bronze, the juxtaposing polished zinc vertical allows for light to bounce within and illuminate the cabinet compartments. The top shelf's satin sheen finish provides a gentle illusory reflective surface.

Each piece is a carefully hand crafted work of master artisans. Due to unique metal application processes, irregularities in the surface and finish should be seen as valuable, painterly quality of the hand made work.
